

CorreTrak Mobile 2.7.7

Release Notes

Enhancements

1 Enhancement – Special Meal Signature Functionality

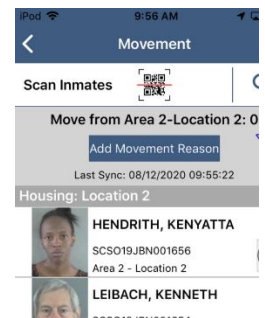

Administrators now have the option to require Mobile users to capture a signature during a special meal delivery. The signature will be reflected on the Inmate and Meal Delivery dashboards. This gives the users an extra check to ensure the correct special meal was delivered to the appropriate inmate.

See CorreTrak Web enhancement #2 for additional details on Special Meal signatures.

2 Enhancement – New Grouping and Sorting in Movement

Inmates in the Move, Quick Move, Receive in Transit, and View by Location screens are now grouped by location then sorted by alphabetical order. Headings have been added to the roster screen to indicate groups of housing locations.

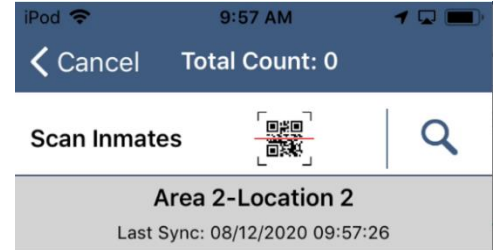

3 Enhancement – Rounds Observation Default To Last User Entry

Administrators now have the option to enable a setting that will set the Rounds observation to automatically select the last observation entry the user made. Once the user logs out, the Rounds observation will revert to the default, if any, that is configured for the system. This is especially useful for officers who need to perform frequent checks where observations seldom change.

Administrators can turn this feature on in Admin|System settings under “Default to Last Observation”.

4 Enhancement – Improved Area and Location Labels

In the Count and Movement modules the headings have been changed to display both the selected Area and Location, making it clearer to the user.

Bug Fixes

1 Scanning Large Numbers of Inmates in Full Count Performance Issues

Resolved an issue where scanning multiple inmates in the Full Count module resulted in slowness or in some cases an app crash.

2 Inmate Locations Were Not Updating After Full Count Roster Loaded

Pulling down to refresh a roster of inmates in Full Count would not display new inmates who were moved to that location. Now pulling down to refresh will capture those changes, and any new inmates in the location will be shown and placed at the top of the roster.
