

CorreTrak Web 2.7.7

Release Notes

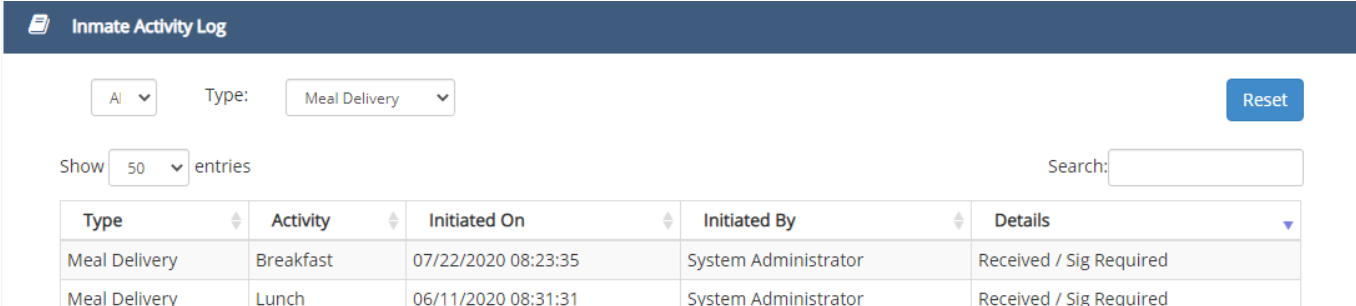

Enhancements

1 Enhancement – Improved Data Handling And Filters For Dashboards

Dashboards with large amounts of data, such as Activity Log, were experiencing performance issues. The default time filter for the page has been changed to one day (24 hours) to reduce the initial load time of the page. Additional changes have also been made to the database to avoid performance issues displaying and navigating through large amounts of data within the dashboards.

2 Enhancement – Special Meal Signatures

To accommodate the new signature capture feature for inmates receiving special meals on the Mobile app, the Inmate and Meal dashboards have been updated. The Inmate Detail page now displays a Special Meals section with any special meal(s) assigned to the inmate. In the Inmate Activity log section of the page users can see the status of the meal delivery and whether a signature was required.

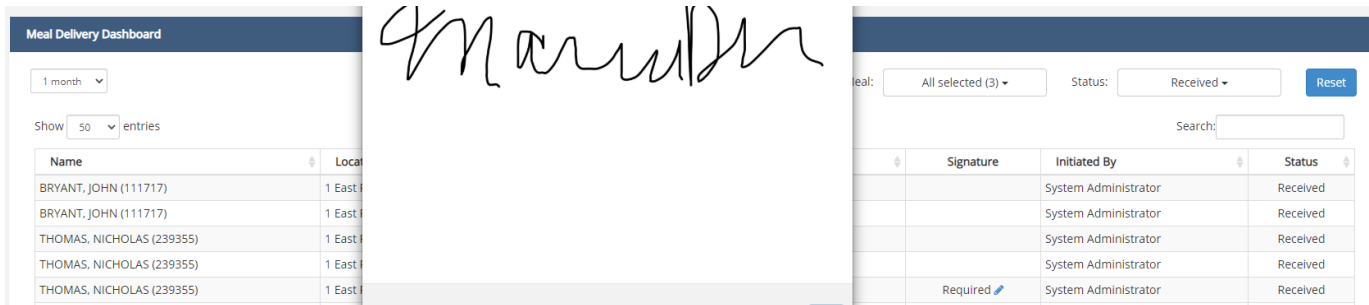

Inmate Activity Log

AI | Type: Meal Delivery | Reset

Show 50 entries | Search:

Type	Activity	Initiated On	Initiated By	Details
Meal Delivery	Breakfast	07/22/2020 08:23:35	System Administrator	Received / Sig Required
Meal Delivery	Lunch	06/11/2020 08:31:31	System Administrator	Received / Sig Required

Web users can view the recorded signature in the Meals dashboard by clicking the blue pen in the “Signature” column.

The screenshot shows two parts of a web application. On the left is the 'Meal Delivery Dashboard' with a filter for '1 month' and a table of meals. On the right is a detailed view of a meal with a signature field and a table of meal details.

Name	Location
BRYANT, JOHN (111717)	1 East
BRYANT, JOHN (111717)	1 East
THOMAS, NICHOLAS (239355)	1 East
THOMAS, NICHOLAS (239355)	1 East
THOMAS, NICHOLAS (239355)	1 East

Signature	Initiated By	Status
	System Administrator	Received
	System Administrator	Received
	System Administrator	Received
	System Administrator	Received
Required 	System Administrator	Received

Administrators can enable special meal signatures in the Admin|System settings under “Special Meals Signature Required”.

Bug Fixes

1 Bug Fix – Late Rounds Calculation Fix

An issue was resolved where Rounds were being marked incorrectly late for the first check after a round interval changed. This impacted Rounds locations that contained non-continuous 24 hour schedules, and multiple, active interval schedules. The calculation no longer references whether the rounds check was completed for the previous interval once a new interval is in effect for the location.

2 Rounds Dashboard Displaying Incorrect ‘Initiated By’ User

In some cases the user displayed under ‘Initiated By’ was incorrect or displaying ‘N/A’. This was resolved to accurately reflect the user that initiated the count. If the user has no first or last name assigned to the account the dashboard will display the user login.
